Enrolling People in Courses

To enroll people in courses, you will want to click the  button.

Once you click that, you will see this:

Click  to copy the link. At the bottom of the screen, this message will pop up.

You will have the link ready to be pasted in an email or in a document.

To assign the next course, click the small 'x' in the right hand corner of the white box and move to the next course. Repeat the above steps until you have assigned all courses.

Your employees will have 7 days to activate their code, or you have to assign the 'Token/link' to them again.

When they receive their link in an email, they will have to create an account (cannot just log-in) before claiming their token.

A user guide for participants is located [here](#). We recommend attaching it to the email you send to employees.
