

Safety Seminar

Asbestos for Supervisors

Join Edwin Wooster an expert in Asbestos as he discusses why this substance is still one of the leading causes of death in multiple industries, and at home.

Provincial regulations place specific obligations on employers, supervisors and building owners regarding the management of asbestos in buildings.

This session will provide insight about the measures and options for identification and management of asbestos to minimize the risk to employees and building occupants.

This presentation is intended to provide awareness about the typical uses of asbestos-containing materials, the health hazards of asbestos exposure, and the different asbestos work classifications and the procedures.

About the Speaker:

Edwin Wooster is a Technical Manager in the Hazardous Materials group at Pinchin Ltd and Regional Practice Leader for Hazardous Materials for Saskatchewan, Manitoba and North Western Ontario.

Edwin holds an Engineering Design and Drafting Technology diploma from Red River College and has over 30 years of experience, with more than 20 years in project management of environmental audits and hazardous materials management.

He has a wide range of experience providing consulting services throughout Manitoba, as well as Saskatchewan, North Western Ontario, and Nunavut. Project management experience includes a comprehensive asbestos reassessment project for a national financial institution consisting of over 700 branches across Canada. He has conducted in excess of 500 asbestos survey and inspection projects and is extremely proficient at the collection of field data for the purpose of hazardous building materials surveys.
